## Contents

GLADIOLUS VARIETIES are listed in the following sections of this catalog. The titles of the sections are self explanatory, however, as many varieties qualify under more than one heading, ie., Crinkles is an "Old Timer", a "Famous Parent" and a "Small Flowered Prize Winner", to save duplication they will be listed under but one heading with an explanation of the other qualities being mentioned in the description.

## Bulb Buyers Guide Nuttall's Gladview Gardens

R.F.D. 2, PROVO, UTAH.

#### INTRODUCTION

Dear Glad Fans:

This 1949 Handbook of Gladiolus prices and information comes to you along with our best wishes for the coming season. Thanks for the fine orders of last season and for the expressions and compliments on our service and the quality of our bulbs. Your letters have furnished the inspiration needed to show us the way for additional features and services for 1949.

VISITORS ARE WELCOME

We extend a hearty welcome to visitors to our Gladiolus Fields and to our beautiful State as well. Utah, in the heart of the Rockies, is the central point for visitors to our beautiful Western National Parks and Monuments, namely; Zions, Bryces, Grand Canyon, Arches, Yellowstone, Natural Bridges, Dinosaur, Cedar Breaks, Capitol Reefs, Timpanogos Cave and others. We hope many of you will be induced to travel in Utah this summer.

#### NEW LOCATION

Recently we were able to purchase a larger farm, so this summer our fields will be situated two miles southeast of Provo, approximately two blocks east of the Springville Road (Highway 91) on 13th South Street. Right at the foot of the lofty Wasatch Mountains. The complete planting consists of nearly 2000 named varieties and many seedlings. They will be in bloom during July, August, September and perhaps October. Make it a point to come and see them.

\* \* \* \* \*

#### JOIN A GLADIOLUS SOCIETY

Many countries, most states, some cities, counties, etc., now have active gladiolus societies. We will gladly help you get in touch with the society in your locality.

The United States has two National Societies.

#### N.E.G.S.

The New England Gladiolus Society is the oldest and largest Gladiolus Society on the Continent, has many departmental activities, and worldwide membership of over 6000. Each year they publish "The Gladiolus" containing numerous articles, many written especially for the Backyard Gardener, on gladiolus care, culture, selection of varieties, hybridizing, etc. This is a deluxe, flexible, imitation leather bound, illustrated book for your library. This Society also publishes each year, six issues of the "Gladiolus Magazine", containing timely hints and all the latest about glads. For \$2 you get the book and six issues of the maganine. Send to A. N. Drake, Sec. NEGS, Horticultural Hall, Boston 15, Mass., or get reduced rates thru your local affiliated society.

#### N.A.G.C.

Four years ago another group of gladiolus growers started the NORTH AMERICAN GLADIOLUS COUNCIL. For \$1 sent to alfons Bazdorf, Membership Secretary N.A.G.C., Lincoln Park, New Jersey, you will receive four fine quarterly Bulletins filled with the best available gladiolus information.

#### UTAH G. S.

The Utah Gladiolus Society now consists of three associated groups: The Bonneville Gladiolus Society for Northern Utah and Southern Idaho, the Salt Lake Gladiolus Society for the area near Salt Lake City and the Wasatch Gladiolus Society for the South end of the State. These three groups work together and membership in one entitles one to full member privileges in all three. Each group will hold a show this summer and each holds regular meetings. The \$1.50 dues include affiliate membership in the NAGC, which means that each member will get the NAGC Bulletins at no extra cost. For \$3 you may get the combination of NEGS, NAGC and Utah G.S. memberships, which will bring you the finest current gladiolus information printed, Membership privileges, etc., and at a saving of \$1.00. Utah secretaries are; Blaine Boudrero, Sec. Bonneville Gladiolus Society, 175 N. 1st West, Logan, Utah. P. W. Carroll, Sec. Wasatch Gladiolus Society, RFD 2, Orem , Utah. Wesley Smith, Sec. U.G.S., 1041 South 8th West Street, Salt Lake City, Utah. The Utah Gladiolus Society welcomes anyone, anyplace, to join and send flowers for competition at the shows. Those living outside Utah are urged to send their dues to Mr. Smith.

## How New Varieties are Born

There is no phase of flower growing more fascinating than creating new varieties. All that is needed is a keen sense of observation, a well developed curiosity and a pair of deft hands. Of course a yen for keeping records and a few simple tools will aid in the scientific aspects. As most gardeners are well supplied with these qualities, the only other thing needed is a knowledge of the mechanics of hybridization which are so easy they can be performed by a child.

Flowers have two essential sexual parts, the stigma and the anthers. The stigma is the female part. The three anthers are the male parts carrying the pollen. These parts in the center of every glad floret are quite discernable and easily distinguished from one another.

To properly cross glads one should have a supply of the small blank price tags with strings attached, like those used by department stores, a pair of tweezers, a supply of small envelopes and paper bags and a soft

lead pencil.

Go into the garden early on the morning the florets you intend to use first open. With the tweezers remove the anthers from the newly opened floret. These may be dropped into a properly labeled envelope and used to pollenate other specimens. Next, tie a label (price tag) to the floret loosely so as not to interfere with future growth of the seedpod. The label is applied now to aid in finding the prepared floret the next day. To be thoroly accurate and scientific, a paper bag should now be tied over the floret so the bees and humming birds cannot reach the stigma with unwanted pollen. Bagging is not always done as it has been found that if all but the top hood petal is cut or broken away the bees and birds seldom bother it. Many breeders morely remove the anthers, hoping that the few chance crosses may give as good or better results as their own.

The stigma is seldom receptive the first day so when the desired number of florets are prepared you wait until the next day to do the actual crossing. Crosses are most successful if made during the warmer part of the day, from shortly before noon until about 5 P. M. They seldom take during rainy or damp weather. Upon returning the next day, pollen of the desired variety is dusted carefully upon the three tiny prongs of the stigma of the previously prepared floret. When properly receptive these tiny prongs will be open and covered with a slightly sticky substance. Close observance will soon teach you the proper time to apply the pollen. Now, write the name of the stigma or seed bearing parent followed by the name of the pollen parent on the label.

If your crosses are successful, in three or four weeks there will be fat seed pods that must now be watched so that they may be harvested as soon as the pods begin to split open. Place the pods in properly labeled bags then store them in a dry cool place. When dry clean the pod shells and the thin wafer-like disks off the seed during spare time. In the spring plant the seed one inch deep in well prepared fertile beds, again labeling properly. Keep well watered thruout the season for once they start to grow, only a few hours dry will often kill the tiny seedlings. In sections where the weather is hot and dry a lathe shade will be found helpful. If successful, in the fall you will be able to harvest a small bulb for each seed that grew. They now require the same care as other glad bulbs. With good care many of these should bloom the second summer and you will become a confirmed "Glad Fiend".

It will be found that each seedling has developed into something different. Most will be inferior to existing varieties. The clever breeder, with luck, may be able to pick one or two good ones from several thousand seedlings. The ratio is not high, but the thrill when you do get a good one is great.

Note: Sports are not developed from seed but appear as mutations or freaks that develop in natural bulb

division.

## Remarks

We are probably the only growers who make a definite effort to list all top winners and believe we offer the the most complete list of winners in the U. S. A.

This year the "Bulb Buyers Guide", a new feature, will help you pick the top winners. It lists the 101 varieties that led the Parade of Beauties at the shows, as compiled from the latest complete reports. Several fine new glads are not on this list because their newness and higher price has prevented their being widely grown or exhibited, even tho they are winning in most of the shows where they have been shown. When stocks of these are more widely distributed, their winnings will be much greater. A suggested rule for the bulb purchaser is: Any variety costing over 25c that is able to win 5 or more awards may be as good as, or better than cheaper varieties winning many prizes. Also a variety that can win firsts and championships in shows all over the Continent is bound to be good in your own garden.

#### CATALOG FEATURES

WINNINGS: Using the NEGS and other reliable reports of the major shows held in America in 1946 and 1947 and tabulating only first prizes we find that at least 409 varieties were able to win 3 or more 1st prize awards. Many of these are listed in this catalog. The variety name is preceded by the number of prizes won.

ORIGINATOR: Because in a few cases two or more varieties have been given the same name and to aid those interested in following the work of certain breeders, we are listing the Originator's name. It follows the variety name.

DATE OF INTRODUCTION comes next. A candid opinion here may be of help: Because a variety is a few years old does not necessarily mean it is inferior or outdated.

Indeed these tried and true beauties are usually more dependable than many of the new expensive varieties, which often have been put on the market only because they were "Somebody's Baby" or because the introducer was unaquainted with the fine varieties already available. As proof of the this, check the winnings of Crinkles, originated by Kunderd and introduced in 1916. Minuet by Joe Coleman in 1922 and still the leader in its class, Mother Machree 1927 won plenty of prizes last year, Picardy 1931 winner of more prizes and championships than any other. There is a long list that would be longer if we were not so prone to discard the old in favor of the new. This does not mean that there are no good new glads, but merely that all new ones are not necessarily the best. Where competent judges are used, the ability to win is a very good criterion.

THE CLASSIFICATION NUMBER designating the size and color group into which the variety has been placed by the National Classification Committee follows the date of introduction. It is used and recognized by most Gladiolus Societies in the U.S. and Canada. On the show table, varieties compete in these size and color classes. Turn to Bulb Buyers Guide, page 27 for

complete explanation.

BULB SIZES: Most gladiolus growers supplying the retail trade use three bulb sizes. LARGE BULBS (indicated by L in this catalog) are sorted so that the minimum is 1½ inches in diameter; however most are much larger. It usually takes two years to grow a bulb to this size from a bulblet, altho a percentage of certain varieties, with good culture, will attain this size the first year. Bulbs three years old or over are no longer considered young bulbs. MEDIUM (M) sized bulbs measure 3/4 to 1½ inches in diameter and usually produce about as good flowers as the larger size but generally take longer to bloom. SMALL bulbs (S) or planting stock are those measuring less than 3/4 of an inch in diameter. While this size often produces a fairly large permutage of bloom in certain varieties, they are

usually much later, smaller, often not quite up to par in color and ruffled varieties sometimes fail to show much ruffling. The advantages of buying medium or small bulbs are; 1st in price as they usually sell for 3/4 to 1/4 the price of large bulbs. 2nd they produce more bulblets per bulb than larger sizes where the bulk of the strength goes to produce a fine flower. 3rd purchasing yearling bulbs enables the grower to have young vigorous bulbs of good size for the next year. BULBLETS (B) are the tiny fellows clustered in the roots. These grow into planting stock or larger with good care but seldom bloom the first year. Germination of bulblets not always sure.

DESCRIPTIONS of most varieties are our impressions of the way they grow here in Utah. Blooming dates were tabulated for several years with the conclusion that they were not accurate enough to use in timing for a future show date. Some varieties varied as much as three weeks in our variable Utah weather. Usually most varieties bloom in from 80 to 100 days. Those frequently blooming in less than 80 days are designated as early

and those taking over 100 days as late.

PARENTAGES AND PROGENY: A leading feature of our catalog is the listing of the parents, if known, and the more famous progeny. Parents are listed on the next line below the variety name and the progeny list follows the description. The numbers following the progeny's name, thus Minstrel 6 is the complete known winnings since 1940 for this variety.

It should be realized, some varieties that are exceptional on the show bench may be good parents or may not. Also some varieties are able to pass to their offspring fine qualities that are not apparent in their own makeup. It has been quite definitely proven by livestock breeders and others that the ability and value of a parent is best proven by the records of the progeny of that parent. Or as the Bible states "By their fruits ye shall know them". Except for the few varieties that are the result of self pollenization (natural or artificial) we know that all glads have two parents, even the one or both may be unknown.

Also that a good glad may get most of its good qualities from but one of its parents. While realizing that in all probability some of the new unproven varieties may be just as good or better breeders as the best of these older ones on which we already have records. This in no way reduces the value of the Proven Parents. Picardy, Emile Aubrun, Apricot Glow, Maid of Orleans, and others will be useful for many years. It must be realized too that the picture is never complete. New varieties are being used each year whose progeny will soon pile up an ever increasing number of winnings. Among these never ones that show promise may we nominate the following: Red Charm, Corona, Elizabeth the Queen, White Gold, Myrna and Ivy Robertson. One wonders if any variety will ever catch up with Picardy as most present day winners have Picardy in their pedigree.

For the past two years the writer has been tabulating pedigrees and progenys from all available sources and to have much of this information ready for mailing this winter. Correspondence will be welcomed from those wishing complete pedigree and progeny charts of the leading parents, or other information pertaining to this catalog.

## Read Carefully Before Ordering

The bulbs listed are true to name, young, healthy and sure to bloom. State inspected. Treated in storage and shipped with 5% DDT dust for your protection. While we make no guarantee, we do want satisfied customers and will make every effort to correct errors or misunderstanding. All prices prepaid anywhere in the U.S.A. Orders will be filled and shipped in order of rotation unless later shipment is requested. All stock offered and orders accepted subject to prior sale. Right reserved to limit number of bulbs per customer of scarce items.

TERMS: Cash with order or 25% with order and balance COD (Amount accompanying order must total at least \$1.00) No mail orders for less than \$1.00 and no single item

for less than 10c.

SUBSTITUTIONS: Available stocks of some varieties are small so please state your preference as to whether you desire substitution with something of equal or exceeding value or refund, in case we are out of any of the varieties you select.

QUANTITY PRICES: 25 bulbs or more of one variety and size may be purchased at the 100 rate, which is 8 times

the 10 rate. NO WHOLESALE LIST this year.

BULBLETS: We can furnish BULBLETS of some varieties in larger amounts, pints, quarts, pecks, etc. Send want list if interested.

EXTRAS: On orders of \$1.00 or more, we always add extra bulbs of newer varieties for trial. The larger the order the greater the value of the extras. Look for them. Note: If you would rather have overcount of the varieties you order, please state so.

# Gladview Specials

EXHIBITOR'S COLLECTION: 10 large bulbs each of 10 top winning varieties in the 300, 400 and 500 size classes, each seperately bagged and labeled, but our choice of varieties picked from the 101 class leaders as listed in the BULB BUYERS GUIDE. A collection of superior quality for those who want something special for the shows and their gardens this summer, but are unaquainted with glad names.

100 large bulbs, Prepaid ...... \$6.00

SMALL FLOWERED COLLECTION: 10 large bulbs each of 10 of the better small flowered varieties, each labeled but our choice of varieties. For those who desire an exquisite selection of these dainty little beauties.

\$1 SPECIAL: - Red, White, Blue and all colors, each a different variety, but unlabeled, a veritable Rainbow of color for your garden. 25 large bulbs, Prepaid ..\$1.00

GLAD GARDEN MIXTURE: Suitable for mass effect in the garden. 100 large bulbs, 14" and over, Prepaid ..\$5.00

MEDIUM SIZED BULBS OF GLAD GARDEN MIXTURE: 100 bulbs as above but 3/4 to  $1\frac{1}{4}$  inches in size, Prepaid ..\$2.50

250 MEDIUM sized bulbs of Glad Garden Mixt, Ppd. \$5.00

## \* \* \* \* \* SECTION I

#### RECENT INTRODUCTIONS

In our opinion, based on incomplete show reports and a short aquaintance with some of these, the following introductions of the past two years are the most likely to win a place at the top, when they are more widely grown.

1948

1-2.00 3-5.∞ BONNEVILLE ROSE- Daines-462 L M 1-1.50 4-5.00 (Salbachs Pink x King Arthur) A very ruffled deep lavender rose 6-5:00 1-1.00 whose usual deeper flecking intensif- B 5-1.00 ies its frilled appearance. It is as ruffled as its parent King Arthur but with larger, more wide open and better placed florets. It carries 16 or more buds on a 24 inch flowerhead, six open and several lovely buds in color. Abundant producer of large easy to germinate bulblets that usually bloom the first year. Wholesale prices on request.

CONNIE G.-Woods- 506 For sale by (Elizabeth the Queen x Snow White) originator.

EVANGELINE- Palmer- 560 Any size \$5.00 each (Greta Garbo x Elizabeth the 1 Bulb & 12 Bulblets \$10 Queen)

Tall ruffled light rose with creamy yellow throat. Opens up to 12 florets before fading.

LADY MARIAN - WhiteLight pinkish lavender that
Opens up to 12 ruffled florets at
a time. Keeps well when cut.

ROSE CHARM- Fischer- 360 L 1-.75
(Lavender and Gold x (Maid of M 1-.50
Orleans x Picardy) S 1-.25 10-2.00
Early rose colored glad that B 10-.25
should take the place of Charmaine.
Nicely ruffled, good cutflower, never crooks.

SIBONEY- Allen- 566 L 1-2.50 (King Lear x Lavender Ruffles)
A giant ruffled rcsy lavender.

WHITE CHRISTMAS- Fisher- 500 L 1-1.50
(Myrna x (Maid of Orleans x M 1-1.00
White Ribbon) B 10-1.00
Intensely ruffled pure white of good size and sturdy growth.

WHITE GODDESS- Roberts- 500 L 1-1.50 (Myrna x Heritage)
A big ruffled pure white that grows tall as well as big.

#### \* \* \* \* \*

Somehow, I have been under the impression that it was an arduous and almost impossible task to raise glads in Utah - I don't know what gave me the idea - but now I don't feel nearly so sorry for you fellows as I used to - who would after seeng the bulbs you sent me?

What surprises me most is the superb condition of the bulbs of those blues, all of which are so susceptible to the various corm diseases - how do you do it? All of those bulbs are as clean as choice apples. I'll know where to get good, healthy blues hereafter. G. H. S. -Wis. -

DIADEM-Lines-460 L 1-3.00 (Vista Bonita x New Era) M 1-2.00 Opens 6-8 lightly ruffled rose S 1-1.00 colored florets of good size on a B 2- .25 sturdy plant. Is best fragrant glad. MID-AMERICA- Knierim-550 1-1.50 L (Red Charm x Snow Cruiser) 1- .75 S 2-.30 Giant bright red that should soon B reach the top in its class. Won 12 firsts in 1947. WEDGWOOD- Fischer-L (Lavender and Gold x Seedling) M = 1 - .75Beautifully ruffled and crinkled blue lavender. May not reach the top

because it seldom opens more than 5 or 6 florets but is certainly the most beautiful in its class.

WESTERN STAR- Daines- 530 L 1-.50

(Sport of Picardy)

A clean throated Picardy that

passes this clean throat to its

passes this clean throat to its

offspring. Big glistening salmon

pink with a clean soft yellow throat. Superior to

Picardy for commercial use, exhibition and breeding

purposes.

WHITE CHALLENGE- Arnett- 501 L 1-3.50 (Euides x Picardy) M 1-2.50 Our choice for the best giant B 1-.25 white with markings. Big white with soft rose colored blotch.

#### \* \* \* \* \*

Thank you for the more than generous treatment you gave my late and small order. It was quite a thrill to see some of my old favorites again. -Brandon - Cal.

#### 1946

MYRNA FAY
(Colonial Maid x Early Rose)M 1-.50 10-4.00

Its earliness and ease of S 1-.25 10-2.00

culture may make it possible B 10-.50

for this tall rich lavender to supplant famous old

Minuet as top lavender in its class. Myrna Fay won

8 first prizes in 1947.

ODORA- Nuttall
(E. J. Shaylor x?)

Pink with deeper blotch, opens 6 S 1-.10 10-.80 to 8 florets on a 16 bud spike.

B - 15-.10 Latest reports show that this woodsy fragrant glad (Some say it smells, at least anyone can smell it) is throwing a good percentage of fragrant seedlings, many of them in bizarre colors. A must have for those interested in fragrance.

## EUROPEAN VARIETIES Introduced since the War.

As complete 1948 show reports are not yet in we are listing the following varieties imported from Europe during the last two years. Some will definitely appear among the prize winners in Section II as soon as whey hit the shows. Early reports show several elready in. Note: Abu Hassan found immediate favor and is already at the top in its class (see class 378 on Bulb Buyers Guide, page 29).

BERGERETTE- Konynenburg & Mark- 441 L 1- .25 Good tall pink with deeper throat.S 2- .25 10-1.00

BLOEMFONTEIN- (See Section II)

#### \* \* \* \*

Each year for the past four years I have bought a few choice glads from you, I really have enjoyed them immensely as have my help family. Cumnerson - Ucah.

CRETEIL- K. & M. 1946 330 L 2-.25 10-1.00 Medium sized salmon pink that opens up to 10 florets.

CUBANA- K. & M. 1946 354 L 1-.30 Medium sized deep brownish red. M 1-.20

LAJLA- K. & M. 1946 401 L 1- .20 10-1.60 (Silentium x?) M 2- .25 10-1.00 Pure white with orange blotch. S 3- .20 10- .60

NEW EUROPE (See Section II).

ST. AGNES- 470 L 1-.25 10-2.00 (Picardy x ?)

Large light purple or violet with penciled throat. Said to be the nearest to violet of any Picardy seedling.

SWEHT SEVENTEEN- Blom- 1947 460 L 2- .25 10-1.00 Large flowered pale rose colored M 2- .15 10- .60 glad of good habits and health.

UHU- Pfitzer- 1946 480 L 1-.25 10-2.00 Smoky rose salmon, with a decided bronze cast. Cpens 8 or more closely placed florets.

VINCENTH VAN GOGH-(Picardy x ?) 432 L 2-.25 10-1.00

Very deep salmon pink or light bright scarlet with white penciled lines down the center of the lower petals. Like Valeria but appears easier to propagate.

#### \* \* \* \* \*

Just a few lines to tell you about the fine blooms I had this Summer from your bulbs. Was well pleased with Bluet and also with Mt. Index, a dandy big white.

Have had a good season this past summer, and the bulbs I'm digging now are of excellent quality, and I'm cortainly glad to see good healthy bulbs. Wagner - Ill.

#### SECTION II

#### LARGE FLOWERED PRIZE WINNERS

In Sections II and IV are listed most of the varieties that were able to win 3 or more prizes in U.S. and Canadian shows during the last two years. Many of these are also "Famous Parents". As a complete listing of all the offspring of these parents would take many pages, only the more noted ones are mentioned. The number following the offspring's name is the number of first prizes it has won since 1940.

For further information see "Catalog Features" on

page 7.

Prizes Name Orig-Parent-Date Color Bulb Prices
Won inator age Class Size Per Per

- 21 ABU HASSEN- K. & M.- 1946 378 L 1- .15 10-1.25 Fine clear deep blue, tall and B 10- .10 straight. Very good.
- 56 ALADDIN-Palmer- 1938 532 L 3-.25 10-.70 (Picardy x Royal York) B 30-.10 Huge deep salmon with a cream throat and intense ruffling, a beauty.
  Parent of; Coventry, Sparks, Stephanie, etc.
- 103 ALGONQUIN- Palmer- 1939 436 L 3- .25 10- .70 (Picardy x Commander Koehl) B 30- .10 Big ruffled clear scarlet, brilliant.
  Parent of; Minstrel 6, Carnival.
- 20 ARCTIC SNOW- Harris- 1941 300 L 2-.25 10-1.00 (Maid of Orleans x Picardy) B 15-.10 Tall ruffled white, a beauty.
- 22 ARETHUSA- Fischer- 1938 416 L 2- .25 10-1.00 (Brightsides x Rosemarie Pfitzer) B 15- .10 Intensely ruffled soft buff. Parent

of; Discovery 7, Gleam 4, Ophir 7, Gerry, etc.

- 23 ATHLONE- B.L.Palmer- 1943 416 L 1- .30 10-2.50 (Lady Winsome x Albatros) x B 10- .15 (Purple Glory x Pfitzer's Triumph)
  Beautiful pinkish buff and flesh.
- 29 BADGER BEAUTY- Krueger- 1941 466 L 3- .25 10- .70 (Minuet x Bagdad) B 15- .10 Tall lavender with a cream throat.
- 25 BAGDAD- Palmer- 1935 480 L 3- .25 10- .70 (Emile Aubrun x Apricot Glow) B 30- .10 Giant smoky old rose, late.

  Parent of; Badger Beauty 66, Ruth Van, Honolulu, etc.
- 51 BEACON- Palmer- 1935 436 L 3- .25 10- .70 (Picardy x Mrs.T.E.Langford) B 30- .10 Large light scarlet with a light cream throat. Parent of; Crimson Tide, Block Buster, Snowbank, Triumph (C), etc.
- 50 BIG TOP- Rich- 1942 541 L 2-.25 10-1.00 (Picardy x Truly White) B 15-.10 One of the largest glads, tall pink with deeper throat markings. Parent of; Lorna Doone.
- 26 BINGO- Canine- 1938 517 L 3- .25 10- .70 (Sport of Picardy) B 30- .10 Giant buff colored Picardy.
- 46 BIT 0' HEAVEN- Crow- 1937 320 L 3- .25 10- .70 (Orange Queen x Joyful) B 30- .10 Tall early orange, many open.

  Parent of; Daphne, Palisades, Debutante, etc.
- 14 BLACK DIAMOND- Gelser- 1942 354 L 1-.25 10-2.00 (Morocco x?)
  Ruffled black red. Parent of; Black Witch.

35 BLACK OPAL- Errey- 1936 454 L 3- .25 10- .70 (Morocco x Lucifer) B 30- .10 Parent of; Elack Beauty, Mrs.R.G.Errey, Paul Robeson 12,

Rosy Red 6, Mubia, Dryad, etc.

- 4 BLOEMFONTEIN- K. & M.- 1946 430 S 2- .25 10-1.00 Big salmon pink, yellow blotch. B 10- .15
- 80 BLUE BEAUTY- Pfitzer- 1934 476 L 3- .25 10- .70 Best light blue. Parent of; B 30- .10 Blue Horizon, Concord 3, Royal Blue.
- 9 BRIGHTSIDES- Prestgard- 1934 324 L 3- .25 10- .70 Very early intensely ruffled B 30- .10 bright orange with a yellow throat. Parent of; Arethusa 36, Crinklette 6, Cinderella, etc.
- L 2- .25 10-1.00 B 30- 10 46 BUCKEYE BRONZE- Wilson-1942 486 (Picardy x Aflame) 30- .10 Intensely ruffled rosy bronze.
- 3 BUENA VISTA- D.S. Pruitt-562 L 1- .25 10-2.00 B 5-.10 Giant glistening deep rose red.
- 111 BURMA- Palmer- 1943 462 L 2-.25 10-1.00
  (Browier Henry x King Lear) B 30-.10 Big tightly ruffled deep rose. Parent of; Themesong.
- 29 CALIFORNIA- Salbach- 1939 543 M 3- .50 10-1.50 S 2- .25 10-1.00 (Picardy x Seedling) Big deep pink. Patented. Parent of; Treasure Island.

## Bulb Buyers Guide

(see chart on page 29)

With literally thousands of gladiolus varieties on the market (NEGS and NAGC each listed over 2500 varieties in their 1948 classification lists) and hundreds more coming from the hybridists each year, it becomes increasingly difficult to know what to buy. Naturally, there is no better method of measuring an unfamiliar variety's worth than to check its record on the show bench.

However, too many glads that are able to win a prize or two in their heyday, oftimes in small shows against little competition, are being described hence forth as top winners. At today's more important shows, competition in most classes is keen enough that very few inferior blooms win even a third ribbon. With this in mind, we started, several years ago and intend to continue, to list the current winnings of the leading varieties that won at the larger shows in the U. S. A. and Canada.

Show schedules of the larger shows where the five size classes and the twenty five or more color classes are used, make it possible for well over 100 specimens to win 1st prizes in each division (Single spike, three spike, etc.). After tabulating reports of nearly 50 State, Regional, National and International shows, there were 409 varieties that won three or more first prizes during 1946 and 1947 (1948 reports not all in at time of tabulation). This still makes quite a list to select from.

In an attempt to narrow the field still more and further aid the buyer, we present this year, the BULB BUYERS GUIDE of the leading winners in each size and color class which, including the three ties, cuts the list to 101 varieties. Other purposes of the Chart are; 1. To encourage introduction and sale of better glads in all size and color classes by graphically showing which varieties are todays leaders.

2. To discourage the flood of mediocre varieties in already overcrowded classes

3. To encourage the retention of such wonderful old varieties as Crinkles, Picardy, Minuet, Margaret Fulton, etc., at least until we have something definitely better. Too many of us are led to supplant these fine varieties with new ones simply because they are new and described with bigger words.

4. To encourage the growing, showing and use of more colors, sizes and types. Some classes have few if any qualifying varieties. (See Supplemental Information on

the following pages.)

5. To have a concise list of recognized leaders for use in comparison and evaluation of any variety, old or new. This should be of particular interest to the hybridist, who must decide whether to pull that pretty seedling or carefully tend it, with the hope of its future introduction. Many a beauty, better than any disemminated variety in its class, has been pulled and thrown into the ash heap because its owner had no way of knowing its value.

6. To aid the florist and cutflower grower in selecting the best varieties for their use, for, contrary to the belief of many, the leading winners in a class are nearly always the best cutflowers also. Example: Red Charm, Picardy, Minuet, Leading Lady, Silver Wings, Elizabeth the Queen, Spotlight, Margaret Fulton, etc. 7. We will be glad to hear of other uses you may find for the Bulb Buyers Guide.

#### EXPLANATION OF BULB BUYERS GUIDE

Using NEGS, NAGC and other show reports of the last two years, 1946 and 1947 (1948 reports not all in at time of compilation) and considering only varieties that won a total of three or more first prizes, the top winner in each class is shown.

Both the number designating the color and the color name are given to describe the color classes, with the letter L. standing for Light and D. for Deep (10 L. Yellow means light yellow and 12 D. Yellow means deep yellow and so forth). (Continued on back of Chart)

lowing pages.

The asterisk \* is used to indicate conspicuous markings, thus Ol White \* means White with conspicuous uous markings. 90 A. O. C. means Any Other Color such

as Brown, Green, etc.

The size classes indicate floret size as follows; 100-Miniature (Florets smaller than  $2\frac{1}{2}$  inches in diameter), 200-Small (Above  $2\frac{1}{2}$  inches thru  $3\frac{1}{4}$ ), 300-Medium (Above  $3\frac{1}{4}$  thru  $4\frac{1}{4}$  inches), 400-Large (Above  $4\frac{1}{4}$  to  $5\frac{1}{2}$  inches), 500-Giant ( $5\frac{1}{2}$  inches and larger).

The number preceding the variety name indicates the number of competing varieties that won three or more 1st prizes in this class. The number following the variety name indicates the number of 1st prizes it won to reach top place. Thus 6 SILVER WINGS 38 means that there were six varieties that won three or more 1st prizes in the Giant Pure White (500) class and that, with 38 firsts SILVER WINGS leads the class.

Varieties appearing in capital letters thus, WHITE SATIN are listed with prices, etc., in other sections of this catalog. Those written with small letters thus, Songster are either off the market or obtainable elswhere. This code is used in the Supplemental Information

tion that follows on this page.

# SUPPLEMENTAL INFORMATION to BULB BUYERS GUIDE

W. Reed Nuttall

Nearly anyone who visits the shows or grows many glads will be able to make a list of nominations, to the foregoing chart, of varieties he thinks will eventually supplant the present leaders and fill in the gaps on this chart.

Here is my list and comment;

200 STARLET. 400 SURFSIDE with 24 prizes and now third in its class is my favorite. 500 WHITE CHRIST-MAS is a most beautiful glad but so is SILVER WINGS, the present leader, time will tell which one will be the leader in the future.

- Ol White with markings, why this color is weak I do not know, for plenty of whites with deeper throats are seen in every seedling patch. 101 Only Woodbury by Koerner. 301 I have only old WHITE ORCHID (Bill Purple) available in this class, liked Bob White but have none to sell, maybe Lady Eve is the answer, have not seen it. 501 MT. INDEX seems out of place to me, shouldn't it be in 506 or 507? I nominate WHITE CHALLENGE and SILVER STAR.
- 106 WINTER CARNIVAL and Beauty Baby which I hope will soon be available again. 306 I like MARY ELIZABETH but there is room for improvement here.

110 Brighteyes, China Doll, and the wild G. Primu-

linus and G. Cooperii. I have G. PRIMULINUS.

112 Nothing available. 212 I like Kunderd's LULLABY and GOLD BUG.

116 Nothing available. 416 Look for SUNSPOT to reach the top here.

120 ELDA.

122 Who has one? What's its name? 222 CRINKLETTE also a beauty. 322 BRIGHTSIDES a favorite of mine.

130 How come, nothing here?

- 232 ZONA, like a tiny PICARDY, beautiful. 432 Lots of fuss about SPIC AND SPAN, it will probably be at the top in its class when this years reports are all in.
  - 236 WILL SCARLET also very good. 240 Little Sweetheart, a honey.

241 PINK BUTTERFLY.

142 Nothing, 242 The new Aria and these names found in Tony Birch's NAGC Tabulation; Earlicut, Eileen, Fair Avis and Tops. 442 PEGGY LOU worth keeping and COVER GIRL worth getting more of, in this class.

550 Get MID-AMERICA but dont throw away OHIO NONPARIEL.

152 RED TWEEDLE.

154 What have we? 254 LITTLE WARRIOR also good.

160 Someone must have a tiny rose pink glad: 360 the older ROSE GEM and last years ROSE CHARM are both better for me than CHARMAINE. 460 Saw one spike of LADY MARIAN "What a Glad". 560 What to do with CORONA? Is it rose pink or cream? I like it here. If you or your society

puts it in the cream class then COUTT'S ORCHID with 11, DAWN GLOW with 10 and SENSATION with 10 prizes are your best bet unless you can afford EVANGELINE.

162 PATTY BERG. 262 CRINKLES will again be on top you'll see. 562 Why dont more folks grow and show

beautiful BUENA VISTA?

166 Kunderd's Lavender Beauty is all the name implies, where can I get more of it? 366 Competition keen here. Three varieties neck and neck, LAVENDER QUEEN 32, COLONIAL MAID 31 and BADGER BEAUTY 29, but LAVENDER AND GOLD 17 is my choice of the winners. I think the new WEDGWOOD will push them all in the shade when it hits the shows. 466 MYRNA FAY or HUNTRESS may crowd MINUET of the top but dont be surprized if MINUET makes a comeback. 566 Have not seen SIBONEY or Patrician.

170 Periwinkle. 470 LANCASTER and PURPLE SUPREME

are about equal with KING LEAR for me.

176 What! No little blues. 276 BLUE LILY also can win here. 376 High Life or Better Times. 576 Old Blue Triumphator comes the nearest to making this class. Mrs Kinyon had it a year or so ago. Then there is the new Blue Bonnet by Beardmore.

178 Nothing. 578 You tell me about it.

180 Nothing. Why? 480 My choice over BAGDAD 25, in this order, MOTHER MACHREE 23, RECADO 20, ZUNI 19, and XERXES 4.

290 LOUIS HEMON. Birch also lists Carnival, Madame Curie and Pelletier D'Oisy. What about Kunderd's Truly Brown? I may be able to supply Pelletier D'Oisy and Truly Brown in a year or so.

There it is folks. Wanta make sumpin' of it? Watcha gotta say?

\* \* \* \*

I dug my one BONNEVILLE ROSE I got from you today. The bulb measured almost 3 inches across and actually had 50 bulblets on it. some pretty good size. No other glad in my garden did half so well.

Crandall- Utah.

#### SECTION III

## OTHER STANDARD LARGE FLOWERED AND NOVELTY VARIETIES

(Includes many hard-to-get collector's items)

The following excellent varieties are just as beautiful as many of the prize winners. Indeed, some are yet to reach the show bench in sufficient numbers and will

soon be on the winning list.

Note: Many varieties previously listed in Sections III, V, VI and VII were had only in meager amounts and some were not planted in 1948. Unexpected demand has depleted stocks of many too low to offer until they are replenished when they will again be listed.

Name Originator Parentage Date Class Size Prices
BEAUTIFUL DREAM- Canine- 1939 442 B 10-.10
(Picardy x Pirate) Big deep pink.

BETSY BOB-UP- Canine- 1936 316 B 30-.10 (Sport of Betty Nuthall) Tall late buff.

#### SECTION IV

#### SMALL FLOWERED WINNERS (Classes 100 and 200)

These varieties naturally produce florets of  $3\frac{1}{4}$  inches or less in diameter. They are used extensively for bridal bouquets, small floral pieces, table decorations, sprays, corsages, etc. They are often called baby glads. Their beauty when used alone or with other flowers is unsurpassed. Other advantages are; more bulbs per dollar, more spikes per bulb, earlier blooms from most varieties and less care as the wind never tips them over. The bulbs are smaller in some varieties than those of the large flowered glads.

Prizes, Name, Orig., Parents, Date, Class, Size, Price.

3 AIRY FAIRY- Koerner- 1943 141 L 2- .25 10-1.00 Tiny rose pink, very small. B 10- .10

Salmon pink. Like a miniature Picardy.

#### SECTION VI HYBRIDIST'S LIST OF FAMOUS PARENTS

Most of these have a long list of winnings to their credit, but are now replaced on the show bench by their progeny. Many still win when well grown. Genetically their greatest value lies in providing short cuts to desired qualities thru back-crossing and inbreeding. Most of them are still producing fine seedlings thru the usual method of out-crossing. Note: Back-crossing is the mating of the progeny with some ancestor. Inbreeding is mating brother and sister or the progeny with its immediate parent, and out-crossing is the mating of individuals not closely related.

Name, Orig., Parentage Date Class Size Price

BETTY NUTHALL- Salbach- 1928 420 B 30-.10 (Richard Diener x Salbach's Prim)
Salmon pink, yellow and orange. Parent of: Diane 31.

#### SECTION VII

#### SOME FAMOUS OLD TIMERS

Because of their value for comparison, hybridizing, historical data, sentiment and some are still the equal of present day glads, we have been trying for several years to obtain the names, and bulbs when possible, of the twenty-five best glads of each decade, and will welcome correspondence with any "Fan" who can help in compiling a good list of "Old Timers" or other information along this line. We will pay cash or trade equal value from this catalog, for any of the following; Anna Eberius, Aviatrix, Baron Hulot, Bellevue (N), Bengal Beauty, Blye Jay, Capt. Boynton, California (Burbank), Chateau Thierry, Europa, Dr. L. H. Bailey, Eve, Highland Mary, Jane Addams, Kunderdii Glory, Lighthouse, Long fellow, Mary Fennell, Marie Kunderd, Niagara,

Paisley, Pink Wonder, Princeps, Rouget de Lisle, Pythol Queen Louise, Queen Mary, Richard Diener, Schwaben, Stately Lavender, Tangerine, Tidbit, Twin Fires, Victor (Errey), Sir Galahad (Stephens), White Giant, and the following botanicals and early hybrids; Gandavensis, Hirsutus, Psittacinus, Saundersii, Oppositiflorus. These must be gauranteed true to name and healthy. Preferably small or medium sizes grown from bulblets. In lots of 3 to 100 bulbs. State price, amount, size, and varieties in first letter.

In our opinion a glad variety that has been on the market for twenty years or more can veritably be called an "Old Timer". Besides the "Old Timers" listed in the foregoing sections we have small stocks of the following to offer for sale;

Name, Originator, Parentage, Date, Class, Size, Prices

ALICE TIPLADY- Kunderd- 1915 320 B 30-.10 Early saffron orange.

BREAK O' DAY- Bill- 1924 440 B 30-.10 Very early light salmon pink.

#### GLADS ARE EASY TO GROW

- 1. Dip 'em- 3 hours, 1 teaspoonful Lysol to 1 quart of water, then plant immediatly.
- 2. Plant 'em- 4 to 6 inches deep in fertile soil, where they will get full sun.
- 3. Irrigate 'em- Regularly and liberally as needed.
- 4. Dust 'em- When up 6 inches high and every 10 days thereafter with 5% DDT.
- 5. Use 'em- Wherever a beautiful bouquet is needed.
- 6. Dig 'em- 8 to 10 weeks after they are thru blooming, unless they were planted late, then dig before severe frost.
- 7. Cut off tops- Same day as dug.
- 8. Store 'em- In a cool dry place, avoid freezing. No sand, No soil, No muss, No fuss.
- 9. Clean 'em- 6 weeks after being dug or when thoroly dry, remove old roots and any adhering soil, leave husks on.
- 10. Dust 'em- 1 tablespoonful 5% DDT per 100 bulbs and return to storage.
  - (For more detailed cultural directions see our 1948 catalog or if you do not have one ask for it when placing your order.)
